Objective

Computer Science Engineering (AI & ML) undergraduate with hands-on experience building end-to-end agentic AI systems, full-stack web applications, and explainable ML models. Experienced in developing secure FastAPI backends, integrating LLMs, and implementing computer vision solutions. Proven track record of delivering real-world projects in fraud detection, corporate risk analytics, and enterprise management platforms.

Education

- Lokmanya Tilak College of Engineering Navi Mumbai
  B.Tech in Computer Science Engineering (AI & ML) -(2023-2027)

- Rajiv Gandhi Arts and Science Junior College Chh. Sambhaji Nagar
  Higher Secondary Education (Science) - (May 2022)

Key Skills

- **Programming & Development Tools:** Python (Fundamentals), C, JavaScript, TypeScript, HTML5, CSS3, Bootstrap, React.js, FastAPI, Flask, Node.js, REST APIs, JWT Authentication, RBAC.
- **AI/ML:** Machine Learning Fundamentals, Deep Learning, CNN, NLP, Image Classification, TensorFlow, Scikit-learn, OpenCV

Internship

Infosys Springboard Internship 7.0 – (Sep2026 – Present)
Agentic AI for Franchise Management System with Performance Monitoring Assistance

- Contributed to an AI-powered franchise management and performance monitoring platform.
- Worked on JWT authentication, RBAC, SQL-based AI Copilot, and role-based dashboards.
- Tech Stack: Python, FastAPI, SQLite, SQL, JWT, RBAC, AI Agents**.**

Project

1. FranchiseOps AI – Agentic AI Franchise Management System

2. VerdeSight AI – ESG Intelligence Platform
React, TypeScript, Python, Scikit-learn, SHAP, LIME

- Developed an ESG analysis platform with ML-based risk prediction, ESG scoring, and sustainability recommendations.

3. BetShield AI – Fraud Detection Platform
Python, ML, FastAPI, Flutter, PostgreSQL

- Built a fraud detection system using the PaySim dataset with ML classification, risk analysis, and fraud alerts.

4. CNN-Based Image Classification – AI Image & Plant Disease Detection
Python, CNN, TensorFlow, Flask, OpenCV

- Built CNN-based image classification systems for AI-generated image detection and plant disease identification.

Research Paper

Research Paper ICRMRI 2026 - VerdeSight AI: An Explainable, Open-Source ESG Decision Support and Risk Monitoring Platform Using Multi-Source Data, Machine Learning, and Large Language Models

Communication

- **Marathi** (Fluent) | **Hindi** (Fluent) | **English** (Intermediate)
